

## THE CLIENT

Our client is a leading global specialist technical services company. They are recognized as the global benchmark for quality and integrity. With more than 80,000 employees and a presence in over 140 countries, they operate a network of more than 1,650 offices and laboratories globally.

## WHAT THE CLIENT HAS TO SAY

“ I invested in SPEKTOR Drive to support the investigation function within our company by providing a cost effective method of acquiring potential digital evidence and to save time in the sifting of this data set so as to quickly find strong and conclusive evidence upon which disciplinary or process decisions could be based.

The first case in which a SPEKTOR Drive was used showed to me that the equipment could deliver both these objectives. A misconduct case in Asia required the acquiring and analysis of the digital data contained on four desk top PCs. The investigation team’s capability to use SPEKTOR Drive to secure the digital data and perform initial analysis themselves in an evidentially sound fashion saved both the time and expense associated with sending a specialist contractor to do this.

In half a day all the PCs were imaged and, after initial analysis, key data was identified and sent to ETL for hosting in their hosted review environment. The investigation team then used this effective support from ETL to further analyse the data themselves remotely.

This had the advantage of saving money on external analyst support and leveraged the team’s in-depth knowledge of the case, avoiding lengthy briefing sessions with contractors. This allowed the investigation to move on at a much swifter pace. The search of the data in a logical and accessible manner provided results during the first day. Highly impactful evidence was found relating to the case in hand and it also revealed other issues which had not been on our radar.

SPEKTOR Drive delivered what it promised: it saved significant time during the investigation and reduced operational costs by allowing the investigators to replace expensive contractors, both without diminishing the integrity of the evidence discovered.

The telephone support to the investigators using the equipment in the field was hugely beneficial. Training is one thing, doing it for real is another thing entirely. ETL’s assistance to the investigators getting the most from SPEKTOR directly contributed to the success of the operational work.

# SPEKTOR™ DRIVE

FORENSIC INTELLIGENCE ON THE MOVE

### THE POWER OF SPEKTOR ANYWHERE

SPEKTOR Drive temporarily turns almost any computer into a powerful digital forensic triage, analysis & imaging solution for non-expert users.

The new SPEKTOR Drive delivers the power of SPEKTOR Forensic Intelligence on a USB device giving you ultimate flexibility to build capability wherever you are.

SPEKTOR Drive is a mission ready solution for people on the move in challenging environments.

## VALUE PROPOSITION

### FULL ROI ON ITS FIRST USE

Our users tell us that SPEKTOR pays for itself on the first job. This user deployed eight SPEKTOR Drives worldwide and has already reduced their outsourced forensic costs during the first 6 months by more than the total purchase cost of all the SPEKTOR kits.
