

DRIVE[®]

SPEKTOR

Designed specifically for use by non-technical investigators

SPEKTOR Drive is contained on a bootable USB stick that turns your PC or Apple Mac into a fully functional SPEKTOR Forensic Intelligence unit. It is used by front line police and other enforcement officers around the world to rapidly preserve and automatically examine data stored on computers and mass storage devices.

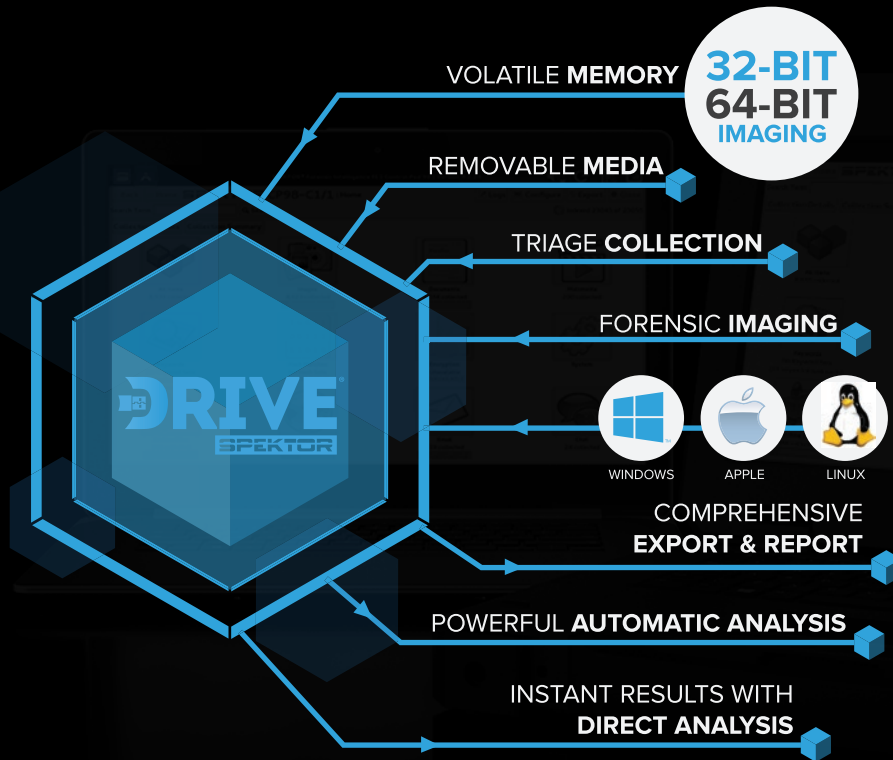

FORENSICS FOR THE FRONT LINE
WITHOUT THE RISK

KEY FEATURES

ALL THE POWER OF **SPEKTOR** IN YOUR POCKET

FULLY PORTABLE

CONVERT A PC OR MAC

SPEKTOR Drive allows you to convert a suitable PC or Mac into a powerful, fully functional SPEKTOR Forensic Intelligence unit.

PROCESS DRIVEN

INTEGRITY ASSURED

SPEKTOR enforces total control and audit of the entire process life cycle.

All user and system actions are recorded, collected data is hashed and the user is guided through the entire process.

COLLECT IN MINUTES

PC, MAC, LINUX & REMOVABLE STORAGE

Our unique ultra-fast collection technology means SPEKTOR completes collections in minutes against live or powered off systems and removable storage devices.

INSTANT SEARCH

KEYWORDS, HASHSETS & MORE

Store thousands of keywords and millions of hash values in multiple lists organised into categories of your choice.

SPEKTOR automatically detects a number of common data formats such as valid bank card and IMEI numbers.

POWERFUL REVIEW

FILES, USER ACTIONS, SYSTEM CONFIG

View images & multimedia, read documents and email, review chat and social media, reconstruct online activity and much more.

ACCEPTED

FORENSICALLY & EVIDENTIALLY

SPEKTOR uses standard & accepted forensic techniques to preserve & protect original data while creating full forensic images, performing triage collections or collecting targeted files.

Forensic confidence is everything and SPEKTOR delivers total control with audit logs of user actions and system events.
